Coursework 2023 Marking Criteria

The mark scheme has four criteria.

A max of 2 marks for **Interesting, topical or important [I]**
3 for **Correct and Plausible** (technical part). [C]
3 for **well-written and coherent**, including figures [W]
2 for **right level** (eg ok for a partially technical boss, see Task spec) [R]

Total 10.

You will need your full academic judgement to mark. The coursework is not of a yes/no multiple choice type.

Please keep a track of I, C, W and R scores. You can note this on the script if easier. This will make it easier if a student queries a mark.

The underlying intention is to give students an idea of a project that is more like a real-world project, and less like a set of school maths problem sets (which they're very familiar with)
